Compact array

Code:

```
<?php  
$name = "Hitesh";  
$subject = "php";  
$arr = compact("name", "subject");  
print_r($arr);  
?>
```

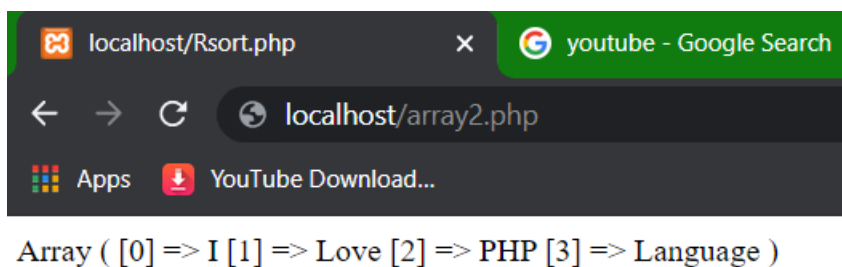

Output:

Code:

```
<?php
$mystring = "I Love PHP Language";
$arr = explode(" ", $mystring);
print_r($arr);
?>
```

Output:

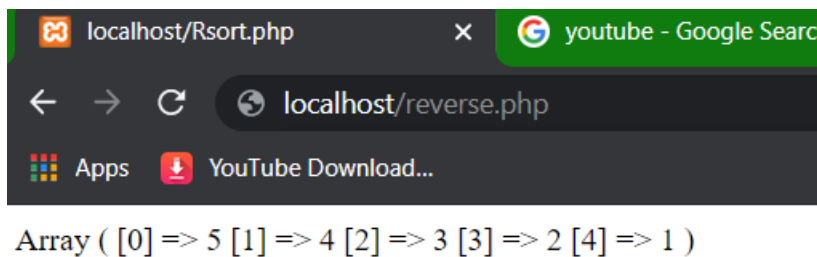

Reverse array

Code:

```
<?php
$arr = array('1','2','3','4','5');
$revarr = array_reverse($arr);
print_r($revarr);
?>
```

Output:

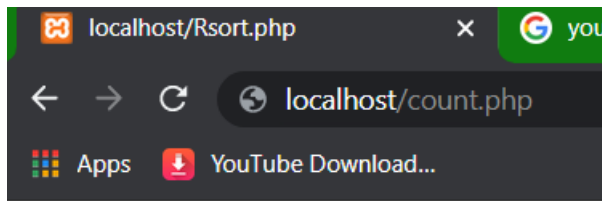

Count array

Code:

```
<?php
$arr = array('1','2','13','42','12','6','17');
echo count($arr);
?>
```

Output:

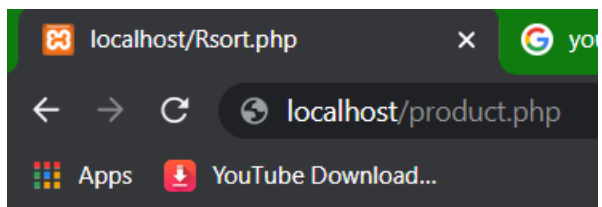

7

Product array

Code:

```
<?php
$myarray = array(10,20,30,40,50);
echo array_product($myarray);
?>
```

Output:

18000000

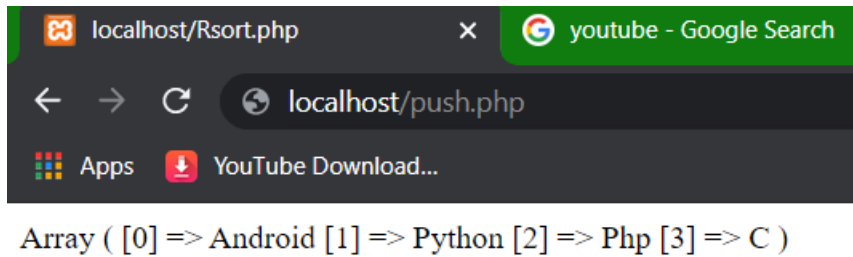

Push array

Code:

```
<?php
$a=array("Android","Python");
```

```
array_push($a,"Php","C");  
print_r($a);  
?>
```

Output:

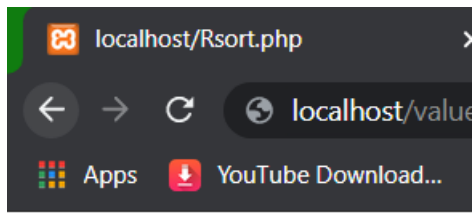

Value array

Code:

```
<?php  
$arr = array("i"=>"c","want"=>"PHP","learn"=>"ANDROID");  
$myarr = array_values($arr);  
foreach($myarr as $key => $value) {  
echo " <br />$key - $value";  
}  
?>
```

Output:

0 - c
1 - PHP
2 - ANDROID
